

ON-SITE SERVICES

Health and Wellness Clinics

Industries Served

Employers partner with Medcor Canada to operate clinics on-site, utilizing evidence-based medicine, professional staff and efficient systems. We are able to serve clients in a wide variety of industries, including: retail and distribution, entertainment and hospitality, construction, power and petroleum, manufacturing, mining, food and beverage processing, pharmaceutical, agriculture, corporate headquarters and more.

Advantages of Being On-Site

Medcor Canada's clinics are located on-site or near client facilities. This ensures convenient access for employees and reduces time away from work while receiving care. Employees receive immediate attention for their injuries and illnesses, which leads to better treatment outcomes. Having Medcor Canada on-site means that our clinic associates become familiar with their clients' policies and work environments. Being on-site enables close collaboration with safety, risk, human resources and operations staff.

Configuring Services for Each Client

Medcor Canada collaborates with each client to determine the optimal mix of services to meet their needs and budget. Clients select the scope of services, clinical staff levels and hours of operation, up to 24/7 coverage. Medcor Canada's services are integrated with our clients' existing programs. Prevention and wellness are supported with targeted clinical interventions.

Clinical Levels

Medcor Canada's on-site services are delivered by a variety of clinicians:

- EMRs, Primary Care Paramedics, Advanced Care Paramedics
- Registered Nurses and Occupational Health Nurses
- Physician Assistants and Nurse Practitioners
- Physicians
- Other health professionals (including wellness, nutrition, and fitness coaches and educators)

Electronic Medical Record

Medcor Canada's proprietary Medfiles™ system was developed in-house specifically to support on-site clinics. Our software automates documentation and reporting; it tracks all injury and illness data, performs trend analyses for safety and complies with all OHS regulations. When necessary, Medcor Canada can also use commercial electronic medical records to facilitate transition of existing clinics, access to historical data and integration with other clinics.

Worksite Clinic Facility

Clinics do not need to be large or expensive to be effective. Medcor Canada operates efficiently, making optimal use of the space that is available. We help configure clinics on a case-by-case basis for each client. Clinics range in size and complexity depending on the scope of services and volume of patients being served. Typically, the client provides the space and owns the clinic, while Medcor Canada operates it. We also provide turnkey, pre-fabricated clinics and mobile clinic options, when necessary.

Performance-Driven Value

Medcor Canada's clinics are self-funding: They generate more savings than they cost to operate. A properly planned and managed employer-sponsored clinic provides better access and service at less cost than traditional off-site fee-for-service clinics. Medcor Canada remains flexible to adapt to changing client needs over time, always focusing on the clinical interventions that matter most.

HEALTH AND WELLNESS CLINICS

Scope of Service Options

Occupational Care

- Treatment of work-related injuries.
- Environmental support.
- Surveillance programs.
- Support for industrial hygiene and ergonomics.
- Safety support and training.
- Drug and alcohol screening.

Primary Care

- Management of stable chronic conditions, such as diabetes, asthma and hypertension.
- Management of minor infections and illnesses.
- Refer and coordinate care.

- Response, assessment, initial treatment and stabilization in emergencies.
- Referrals to off-site care and coordination with specialists as needed.
- Basic Life Support and Advanced Life Support pre-hospital care.

Wellness

- Screening, education, prevention and promotion of healthy lifestyles.

Return on Investment

Employers receive solid returns on their partnership with Medcor Canada, built on these benefits:

Improved Productivity

- Faster recovery and return to work.
- More effective use of modified work options.
- Less time away from work for employees seeking care for themselves and their families.

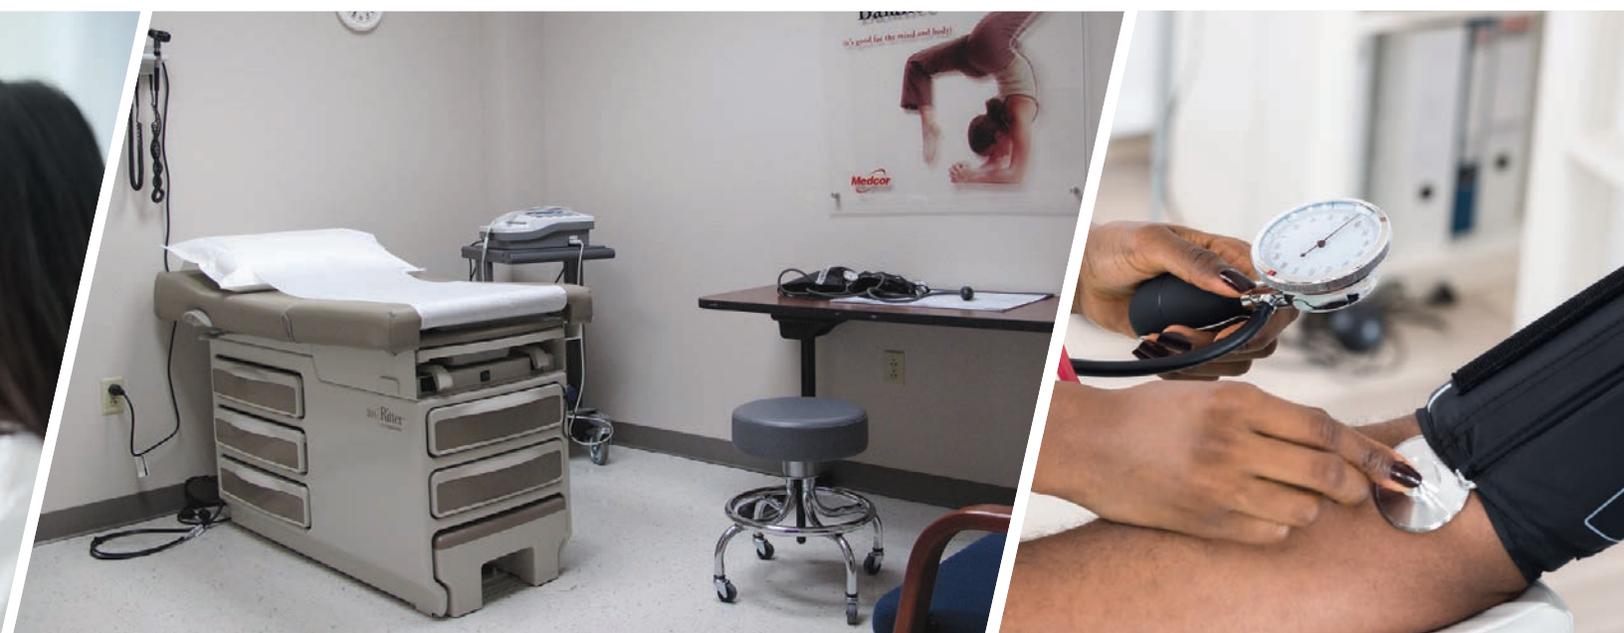

Employment Benefits

- Improved morale from better access to healthcare, lower costs and higher levels of service.
- Less turnover.
- Enhanced recruiting.

Reduced Overall Workplace Injury Costs

- Reduced expenses by avoiding unnecessary claims and costs through early intervention and ongoing follow-up care.
- Reduced lost-time costs by avoiding emergency department waiting rooms and helping employees get back to work sooner.
- Reduced pharmacy costs by avoiding unnecessary prescriptions and by utilizing generics.

Medcor Canada can also provide travel medicine, rural medicine, and – outside of clinic operating hours – 24/7 telephonic injury triage.
