

SAFETY AND HEALTH

Worksite Training and Staffing

Health and Safety Training

Effective training practices are key to preventing injuries, avoiding work interruption, reducing property damage, controlling costs and ensuring regulatory compliance. Training gives employees the necessary knowledge and skills to follow their organization's policies. Medcor Canada provides dynamic, up-to-date training that meets regulatory requirements and can be customized to fit each client's specific needs and program. These practical courses combine hands-on experience with current content.

Worksite Training

Clients benefit from having Medcor Canada conduct its training at their worksite; on-site training reduces travel costs for students and minimizes work interruption. Worksite training also facilitates using site-specific equipment and settings to make the topics relevant. When off-site facilities are required, Medcor Canada can arrange them. Clients also benefit by scheduling training when it is convenient for the client and the students, including training during off-shifts, if desired.

Training classes are available in any province. Clients may also receive instruction at our training facility in Ponoka, Alberta.

Complete Course Content & Materials

Medcor Canada provides all necessary course content, workbooks, checklists, and training materials, including videos and other materials. When large and expensive equipment is required for training, Medcor Canada works directly with clients to determine the most cost effective way of providing the necessary resources.

Certifications

Coursework includes relevant documentation, exams and skill testing and applicable certifications.

WORKSITE TRAINING AND STAFFING

On-Site Safety Staffing

Medcor Canada provides qualified safety staff augmentation to help ensure a safe work environment. We send certified, qualified, experienced and insured safety professionals to worksites to implement and enforce safety, supporting client safety teams and programs. These safety experts can deploy rapidly and fill a wide range of flexible schedules, including 24/7 if needed. Medcor Canada staff can fill short-term and long-term jobs. They have relevant experience in the industries they serve and carry advanced certifications.

Configuring Services for Each Client

Because every industry is different and no two worksites are alike, standard safety programs may not be the right fit for some worksites. Medcor Canada designs client-specific, project-specific or site-specific programs. We can update existing programs, add new modules or design completely new programs. Our safety experts can visit client sites or work remotely with clients to develop customized programs. We can implement and run safety programs for our clients or hand off to in-house teams.

Qualified Professionals

Medcor Canada's safety staff are dedicated professionals. They combine effective skills with real world experience in the work that they perform. They hold relevant certifications and have a passion for what they do. They are committed to ensuring compliance with clients' safety programs. They adhere to the highest government and professional safety standards.

WORKSITE SAFETY | MOBILE HEALTH | 24/7 INJURY TRIAGE | ON-SITE CLINICS | EMPLOYEE SCREENING
